Alexis Anzaldo

Mexicali, Baja California, Mexico | 6861931011 | ancalexis@hotmail.com

LinkedIn: https://www.linkedin.com/in/alexis-anzaldo/ | Portfolio website: https://alexis-anzaldo.github.io/

SKILLS

- Programming: Python (Tensorflow, Dagster, Pytorch, Scikit-Learn, OpenCV, Pillow, Pandas, Seaborn), SQL, HTML/CSS.
- Tools: Microsoft Office, Power BI, Matlab, Labview.
- Spanish: Native. English: B2.

EXPERIENCE

Data Scientist - Skyworks Solutions, Inc.

Jun. 2023 - Current

- Applies analytical techniques for valuable insights through data cleaning, feature engineering, and comprehensive analysis.
- Conducts Research and Development of predictive models and algorithms, optimizing inspection processes and guiding strategic business decisions.
- Showcases feasibility of new ideas and technologies through crafting Proof of Concept (PoC) demos and prototypes.
- Develops and implements computer vision algorithms in product development and inspection processes to enhance functionality and performance.
- Drives process optimization initiatives, improving overall efficiency, and integrates AI systems seamlessly into existing workflows.
- Deploys and manages data pipelines using Dagster, ensuring efficient orchestration and integration of data workflows across various projects.

PROJECTS

Deep Reinforcement Learning for resource allocation in wireless networks

- Accelerated the learning of the conventional Deep Q-Network model for power allocation in wireless networks by up to 77% and improved the network performance by up to 24.7% by proposing different training strategies with transfer learning. Simulations were performed using Python using Pytorch.
- Conceptualized, analyzed, and wrote three published refereed articles in top journals from Q1 and Q2 in the computer science area.

San Diego home price prediction

- Collected and scraped data using BeautifulSoup and preprocessed it by cleaning, handling missing values, and detecting outliers with Python.
- Trained a regression model and achieved an accuracy score of 83.7% using grid search with scikit-learn in Python.
- Deployed the trained model on a Flask server to make predictions and hosted it on a web page using HTML/CSS.

Explainable AI (XAI) for beer brand classification

- Implemented GRAD-CAM, an explainable AI method, to interpret the Convolutional Neural Network (CNN) decision-making for beer brand classification.
- Fine-tuned the VGG16 CNN architecture with additional layers to achieve an accuracy of 91.6%. Data augmentation, preprocessing, and training were performed using libraries such as Keras and Sklearn.

EDUCATION

Ph. D. in Science and Engineering	2019-2023
Universidad Autónoma de Baja California – Mexicali, Baja California, México	2024 2025
Diploma in Project Management	2024-2025
CETYS Universidad – Mexicali, Baja California, México.	
CERTIFICATIONS	
TensorFlow: Advanced Techniques Specialization, DeepLearning.AI, Online.	In Progress
• IBM AI Engineering, IBM, Online.	Sep. 2023
Directical Data Science on the AWS Cloud Specialization Amazon Web Services (AWS) Online	Mav 2023
• Flactical Data Science on the Aws cloud Specialization, Anazon web Services (Aws), Onnie.	-)
 Google Data Analytics Professional Certificate, Google, Online. 	May 2023
